PROFILE

Full stack developer with practical experience in designing and developing web applications using technologies like HTML, CSS, JavaScript, React.js, Node.js, Express, and PostgreSQL. Built multiple personal and academic projects that demonstrate front-end and back-end integration, API handling, and responsive design. Familiar with Git for version control and comfortable working in collaborative environments. Quick to learn new tools and focused on writing clean, maintainable code

EDUCATION

Jeevan Jyoti H.S School

High School

Oriental Institute of Science and Technology

Bachelor Of Technology

PROJECTS

Portfolio ↗

Full Stack – Hive Chat ↗
- Developed a real-time chat application with user authentication.
- Implemented Socket.IO for live, bidirectional messaging.
- Utilized PostgreSQL for efficient user data and chat message storage.
- Created a responsive front-end interface using HTML, CSS, and Material UI.

Date Picker Component ↗
- Expanded a custom date picker component using React and Tailwind CSS.
- Implemented range selection, disabled dates, and customizable date formats.
- Ensured a mobile-first responsive design across all screen sizes.
- Developed modular, reusable code for effortless integration.

Online Quiz Website ↗
- It is an interactive platform designed to test knowledge across various topics in an engaging way.
- Features multiple-choice questions and real-time scoring for an intuitive learning experience.
- JavaScript handle all the quiz logic, including question display, answer validation, score tracking, and result display.
- Developed using HTML, CSS, and JavaScript
