

Shubhashita Singh

Nagpur, Maharashtra | +91 9119881886 | shubhashita.aes@gmail.com | <https://www.linkedin.com/in/shubhashita-singh>

EDUCATION

Bachelor Of Technology

Oriental Institute of Science and Technology
Bhopal, Madhya Pradesh
CGPA: 8.63/10

PORTFOLIO

<https://ishubhashita.web.app>

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Bootstrap, jQuery, Material UI

Backend: Node.js, Express.js, Socket.IO, RESTful APIs

Database: SQL/MySQL, PostgreSQL, MongoDB

Languages: Java, C /C++, Python

Tools: Git, GitHub, VS Code, Postman, Jira Board

Technologies: Docker, ORM/ODM

Core CS Fundamentals: OOPs, Data Structure

CERTIFICATES

- [Java \(Basic\) – HackerRank \(2025\)](#)
- [Google Cloud – Introduction to Generative AI \(2025\)](#)
- [Cisco – Introduction to Networks \(2022\)](#)

INTEREST AND HOBBIES

Exploring my creative side,

- Reading books.
- Traveling to explore nature.
- Playing chess.

PROFILE

Backend developer with hands-on experience in Node.js, specializing in creating and integrating RESTful services. Adept at working with MongoDB and React, supported by a strong grasp of end-to-end development workflows. Able to seamlessly bridge server-side logic with interactive interfaces, ensuring smooth data flow and responsive user experiences. Committed to producing clean, reliable code and building solutions that are practical, scalable, and aligned with user needs.

PROJECTS

Full Stack – Hive Chat (<https://hivechat-client.vercel.app>)

- Architected a scalable messaging platform using the **MERN stack (MongoDB, Express, React 19, Node.js)**, utilizing **Tailwind CSS** and **Material UI** for a modern, responsive interface.
- Integrated **Socket.io** to enable low-latency **1-to-1 messaging**, featuring **live user status tracking** and **instant message delivery** notifications.
- Implemented secure user onboarding and sessions via **JWT (JSON Web Tokens)** and **Bcrypt hashing**, complemented by server-side data validation using **Joi**.
- Engineered a file-sharing system using **Multer** and **Cloudinary** for the persistent storage and retrieval of **image and audio attachments**.

Todo App – SLATE (<https://todo-board-frontend-beta.vercel.app>)

- Built a responsive project management app using the MERN Stack (MongoDB, Express, React, Node.js) with JWT authentication and Tailwind CSS.
- Implemented a seamless drag-and-drop board using **@dnd-kit** and a dynamic "Recycle Bin" system for advanced task lifecycle management.
- Integrated S3/MinIO and Cloudinary for secure, multi-file uploads with automated storage cleanup and pre-signed URL access.
- Developed high-performance RESTful APIs with **Joi** validation, RegEx-based search, and complex multi-criteria filtering.

Airline Management System

- This project automates the registration process of an airline management system.
- Provide information about passenger details, flight information, and allows storing and retrieving data related to the airline industry.
- The system also allows us to add records when a passenger reserves a ticket.
- Built using Java core, Swing, and MySQL for data storage and retrieval.
